

VEON

NOMINATION

HORIZON 1440

AI-assisted geopolitical early warning, built by
Corporate Affairs in eight weeks.

WHY IT MATTERS

For VEON, being informed is a strategic capability

Geopolitical developments can change our operating environment overnight. Earlier insight gives us more time to act.

01

Protect our people

02

Sustain connectivity

03

Make informed investment decisions

WHAT WE BUILT

An early-warning solution from commercial signals

Our team used AI-assisted coding to combine aviation data, insurance pricing, fuel prices and futures with specialist intelligence.

Working with Osprey Flight Solutions, we explored how unusual patterns can help identify emerging risks across VEON markets and beyond.

A **Aviation activity**

B **Insurance pricing**

C **Fuel prices and futures**

D **Specialist intelligence**

→ **Unusual patterns, reviewed by analysts**

HOW IT WAS BUILT

Four sprints, eight weeks, one department

4

SPRINTS

2

WEEKS EACH

8

WEEKS TOTAL

AI-assisted coding let Corporate Affairs translate its own analytical needs into a working solution, without waiting for a build queue.

THE AMBITION

A clearer view for the Board

WHAT **What may be changing**

WHERE **Where VEON is exposed**

WHICH **Which decisions deserve attention**

UPSIDE

Earlier awareness can also create value

The same signals reveal shifts that warrant commercial investigation.

SHIFT 01

Trade routes

SHIFT 02

Market conditions

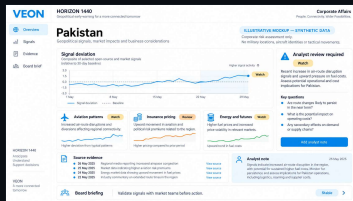

SHIFT 03

Stakeholder priorities

THE SOLUTION

One framework, five markets

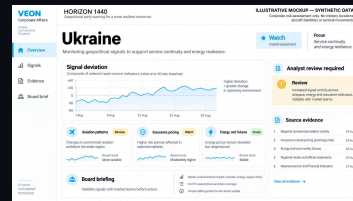

Illustrative views
Synthetic data

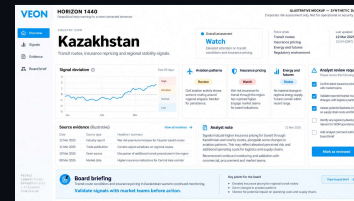

Pakistan

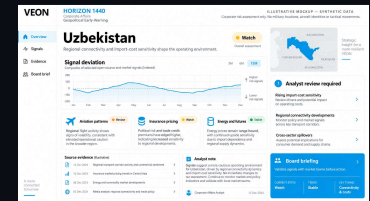

Bangladesh

Ukraine

Kazakhstan

Uzbekistan

Each market view sets local exposure against the same signal baseline, so assessments can be compared and escalated consistently.

Watch

Higher fuel prices and increased price volatility in relevant markets.

Upward trend in fuel costs

Source evidence

- 26 May 2025 Regional media reporting increased airspace congestion [View source](#)
- 25 May 2025 Market data indicating higher aviation risk premiums [View source](#)
- 24 May 2025 Energy market data showing upward movement in fuel prices [View source](#)
- 22 May 2025 Industry commentary on extended route times in the region [View source](#)

👤

Analyst note
26 May 2025

Signals indicate increased air-route disruption in the region, with potential for sustained higher fuel costs. Monitor for persistence and assess implications for Pakistan operations, including logistics, roaming and supplier costs.

Signal deviation ⓘ

Past 90 days

Source evidence (illustrative)

View all evidence →

Date	Source type	Headline / summary
12 Mar 2025	Industry report	War risk premiums increase for Caspian transit routes
11 Mar 2025	Trade publication	Carriers adjust schedules on regional routes
10 Mar 2025	Open source	Discussion of additional transit procedures in the region
08 Mar 2025	Market data	Higher insurance indications for Central Asia corridor

Aviation patterns

Review

Civil aviation activity shows some re-routing around regional airspace. Monitor for persistence.

Insurance pricing

Watch

War risk insurance for transit through the region has repriced higher. Engage market teams for latest indications.

Energy and futures

Stable

No material change in regional energy supply. Futures remain within recent range.

Analyst review required

Please review the following:

☒ Confirm latest insurance pricing with market teams

☒ Validate reported transit route changes with logistics partners

☒ Assess potential business impact on supply chain costs and timelines

☐ Identify any regulatory developments relevant to VEON operations

☐ Add analyst comment before board brief

Mark as reviewed

Analyst note

12 Mar 2025

Signals indicate higher insurance pricing for transit through Kazakhstan and nearby routes, alongside some changes in aviation patterns. This may reflect elevated perceived risk and additional operating costs for logistics and supply chains. Recommend continued monitoring and validation with commercial, procurement and market teams.

Board briefing

Transit route conditions and insurance pricing in Kazakhstan warrant continued monitoring.

Validate signals with market teams before action.

Key points for the board

- Elevated insurance pricing for regional transit routes
- Some changes in aviation patterns
- Monitor for potential impact on operating costs and supply chains

TOMORROW

HORIZON 1440
Corporate Affairs
Geopolitical Early-Warning

ILLUSTRATIVE MOCKUP — SYNTHETIC DATA
Corporate risk assessment only. No military locations, aircraft identities or tactical movements.

Uzbekistan

Regional connectivity and import-cost sensitivity shape the operating environment.

Watch
Overall assessment

Signal deviation
Composite of selected open-source and market signals (indexed)

3M 6M **12M**

Higher risk signals
Lower risk signals

Aviation patterns **Review**
Regional flight activity shows signs of volatility, consistent with elevated operational caution in the broader region.

Insurance pricing **Watch**
Political risk and trade credit premiums have edged higher, indicating increased sensitivity to regional developments.

Energy and futures **Stable**
Energy prices remain range-bound, with continued upside sensitivity due to import dependence and regional supply dynamics.

Analyst review required
Rising import-cost sensitivity
Review drivers and potential impact on operating costs.

Regional connectivity developments
Monitor policy and market signals across key transport corridors.

Cross-sector spillovers
Assess potential implications for consumer demand and supply chains.

Source evidence (illustrative)

Date	Topic	Action
12 Dec 2024	Regional transport corridor activity and commercial sentiment	>
10 Dec 2024	Insurance market pricing trends in Central Asia	>
08 Dec 2024	Energy and commodity market developments	>
05 Dec 2024	Media analysis: regional connectivity and trade policy	>

Analyst note
Signals suggest a more cautious operating environment for Uzbekistan, driven by regional connectivity dynamics and import-cost sensitivity. No immediate changes to our assessment. Continue to monitor market and policy indicators and validate with local market teams.

Board briefing
Validate signals with market teams before action.

A more connected tomorrow

THE ACHIEVEMENT

Corporate Affairs has used AI to build a new analytical capability around a critical business need

The pilot's predictive performance still requires validation. The capability itself is built, in use and owned by the department that needs it.

NEXT MILESTONE

A documented evaluation: timestamped alerts, historical outcomes and decisions informed.

ALIGNMENT

This embodies AI1440's ambition to augment human capability

The solution connects dispersed signals and surfaces anomalies. The judgment stays with the analysts and the leaders they advise.

THE ASK

Recognise HORIZON 1440 for its innovation and its potential to strengthen VEON's resilience and strategic judgment

Better-informed decisions today can protect and create value for tomorrow.
